

CURTAIN MEASURING GUIDE

Step 1: Measure the Drop

Choose your curtain heading type and follow the instructions

Pencil Pleat

Pinch Pleat

Goblet

Eyelet

Tab Top

Measure the distance from the top of the track (or if you have a pole, the bottom of the curtain rings) down to where you would like the curtains to finish. This is usually one of the following:

- 1cm above the floor
- 4cm below the window sill
- the top of the window sill

Measure the distance from the top of the pole to where you would like the curtains to finish. This is usually one of the following:

- 1cm above the floor
- 4cm below the window sill
- the top of the window sill

Step 2: Measure the Width (for all headings)

Measure the entire width of your pole or track.

If you don't have one in place yet, measure the width of your window recess and add 40cm.
